

Marsh plants

planting in 3 steps

1

Use a large plant basket

Use **Floating Plant Islands** for beautiful grown isles in your pond. Use a **Plant Sock** for pond edges and curves.

2

Fill it with pond plant soil

This universal nutritive soil for all pond plants does not pollute the water. Insert the plants.

3

Cover the soil with gravel

A layer of **Pond Gravel** prevents the soil from flushing away and the fish from grubbing.

TIP

Add **Growth balls** to the plant basket for a powerful development of pond plants.
