

Oxygen plants

planting in 3 steps

1

Use small planting baskets

Velda **Plant Baskets** prevent the roots from growing rank and the soil from flushing. Use inlay **Cloth Liners** with coarse plastic planting baskets.

2

Fill it with Superdensa

This growing substrate for oxygen plants prevents suffocation of the roots.

3

Insert the roots of the plant

First remove lead or rubber bands. Place the basket in the pond and that 's that!

TIP

Add **CO₂ Tabs** to the water to stimulate the development of oxygen producing plants.
