

vincia

Natural solution for the pond

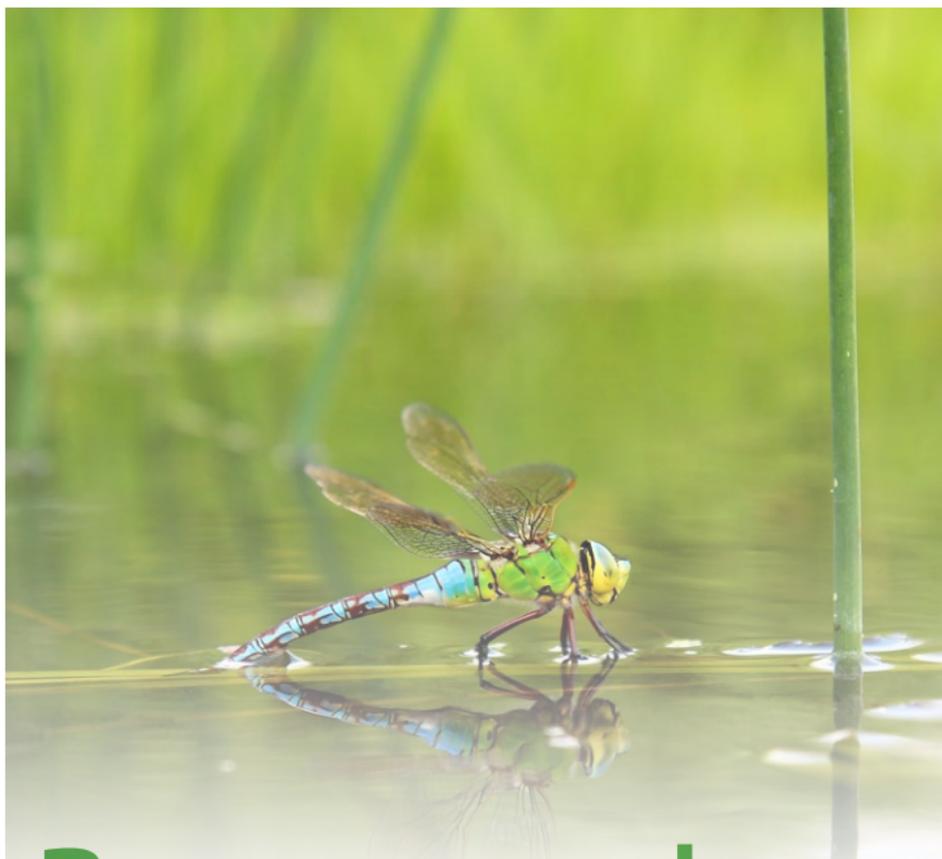

100% biodegradable and
environmentally friendly

100% natural

Algae-free and clear pond water

Nature rules in garden ponds. Natural processes provide a biological balance in the water biotope. Sometimes however, you can give plants and micro-organisms in the pond a helping hand. The Vincia natural products keep your pond free of algae and improve the water quality naturally.

Because you know water brings life

Are you a climate-conscious gardener? You only use natural fertilisers for your lawn. You put garden and kitchen waste in your compost heap to use in your own vegetable garden. You harvest your own fruit trees or herb garden. And you enjoy the biodiversity in your garden to the full.

Enjoy the life around the pond

The natural ecosystem is important for the biological balance of your pond as well. Wastes are converted by bacteria into nutrients for water plants, which in turn produce oxygen, keeping the water biotope healthy. From time to time, you can give plants and micro-organisms in the pond a helping hand. Because you know: healthy water brings the whole garden to life. Birds, butterflies, dragonflies and newts will become frequent visitors and enrich the total garden experience.

Choose Vincia if you prefer natural products. Is your pond used for swimming, or does your dog or cat sometimes drink out of the pond? Vincia natural products are 100% biodegradable and safe for everyone.

Maërl *natural product in powder form for clear water increases the water hardness and activates the bacterial development available in 600, 1600, 3300 and 7500 g for 20.000 to 200.000 litres*

Maërl Crystal *natural product in pellet form for clear water increases the water hardness and activates the bacterial development available in 1600 and 3400 g for 20.000 and 50.000 litres of water*

Sludge Cleaner *natural product that removes bottom sludge removes organic sludge and prevents acidification of the bottom available in 1700 and 4250 g for 10 m² and 20 m² of pond surface*

Algae Cleaner *natural product to prevent algae binds phosphate and stops algal growth due to lack of nutrients available in 1000 g for 20.000 litres of pond water*

Toru-Stroh *barley straw and high moor peat to remove algae removes algae by the activation of the micro life and pH-reduction available in 2600 g for 10.000 litres of pond water*

Strobinol *barley straw to remove algae removes algae by the activation of the micro life in the pond available in 1500 g for 6000 litres of pond water*
