A clean  
water surface

Easy to install  
skimmer for ponds

**Ultra Skimmer**

Pond without  
**floating dirt**

During the seasons, quite some material is blown on the pond surface making it messy. The pond looks unsightly and the view of the fish is poor, due to leaves, twigs and residues. You certainly want to get rid of it. The **Ultra Skimmer** collects floating debris and keeps the pond surface continuously clean.

# Ideal combination for every pond

Floating debris such as leaves, twigs and feed residue inhibit pond fun. Not only the view of the pond and the fish is disturbed, but also the biological balance. This organic material eventually sinks to the bottom of the pond, being a nutrient source for algae. That's something you want to avoid. This free-standing **Ultra Skimmer** keeps the water surface of the pond clean at all times.

## Energy-efficient pond pump

Connect the skimmer to a **Green Line** pump for the circulation of pond water. This dirty-water pump is installed in the pond and it can pump water with dirt particles of up to 6 mm without clogging up. Circulation pumps have to operate day and night, year in and year out. That is why long service life and low energy consumption are guaranteed. Connect the hose socket to the pump inlet of a pond pump, weigh down the base with stones and place it in the pond.

## The solution for every pond

The elastic tube makes the **Ultra Skimmer** suitable for pond depths from 40 to 150 cm. Determine the size of your pond and choose Green Line pond pump from Velda.

- Green Line 5000 l/h for 30 m<sup>2</sup>
- Green Line 8000 l/h for 50 m<sup>2</sup>
- Green Line 12000 l/h for 80 m<sup>2</sup>
- Green Line 15000 l/h for 100 m<sup>2</sup>

## Free-standing skimmer

*Stable base*

*weighted down on the bottom in a stable position*

*Flexible tube*

*automatic adjustment to pond depth*

*Floating head*

*moves with variable water levels*

*Large dirt container 2.5 litres*

*removable collection bin for accumulated debris*
