

# Pond bottom

starting up in **3** steps

1

## Use pond substrate

This is indispensable for the development of micro-organisms and a natural equilibrium in the pond.

2

## Add Bacterial bacteria

Within 24 hours thousand of millions of bacteria will arise for a healthy pond.

3

## Remove bottom sludge

Bio-Oxydator decomposes organic deposit and prevents bottom acidification. Use it in spring and autumn.

**TIP**

In autumn, apply a protective cover net to keep leaves out of the pond.
